When international, state, and/or county boundaries coincide, the map shows the boundary symbol for only the highest-ranking of these boundaries.

- 1 A "*" following a place name indicates that the place is coterminous with a MCD. A "C" indicates that the place is also a false MCD; the false MCD name is not shown.
- 2 This map shows tribal census tract boundaries and numbers within the subject entity; nontribal census tract boundaries are shown outside of the subject entity. Although without exception, tribal census tracts are a type of census tract defined within a federally recognized American Indian reservation or off-reservation trust land for the purpose of providing data based on an individual's tribal affiliation, some tribal census tracts may overlap with federal or off-reservation trust lands cross state or county boundaries. The same tribal census tract number may be assigned on both sides of the boundary, and, in some instances, the same tribal census tract may be assigned on both sides of a county boundary.
- 3 A "*" following a block number indicates that the block number is repeated elsewhere in the block.

Where international, state, and/or county boundaries coincide, the map shows the boundary symbol for only the highest-ranking of these boundaries.

- ▲ "▲" following a place name indicates that the place is coextensive with a MCD, and "▲" following the place is also a false MCD; the false MCD name is not shown.
- This map shows tribal census tract boundaries and numbers within the subject entity; nontribal census tract boundaries are shown outside of the subject entity but without numbers. A tribal census tract is a type of census tract that results from a federal reservation, an American Indian reservation or off-reservation trust land for the purpose of providing data based on an American Indian reservation. A tribal census tract is not a reservation or off-reservation trust lands cross state or county boundaries, the same as a county or state boundary. A tribal census tract is a type of the boundary, and so, it constitutes a single tribal census tract entity.
- ▲ "▲" following a black number indicates that the black number is repeated elsewhere in the block.
